FOREWORD

The classification system of the Library of the *Graduate Institute of International and Development Studies* is based on the *Dewey Decimal Classification* (DDC) used in many libraries in the world. This ensures that books on specific subjects are shelved together.

This classification organises the documents into ten main thematic classes. These ten main classes are then further divided. Every class and subdivision is marked with a class number from 000 to 900.

The classification scheme is divided into two principal sections:

- the *Subject alphabetical index*, giving the class number associated with the subject:
 - ex) Anticolonialism → 325.8
 - Banks → 332.1
 - Climate → 577.22

- the *Subject systematic classification*, giving the definition of each class:
 - ex) 340 → Law
 - 342 → Public law
 - 342.7 → Human rights
