Foreword

Prof. Nathan Sussman

Professor, International Economics, Geneva Graduate Institute Pictet Chair in Finance and Development Director, Centre for Finance and Development Co-Director, MAS in Sustainable Finance and Development

In today's fast-paced world, sustainability is more important than ever. Based in International Geneva, a center of finance and sustainability, the one-year Master of Advanced Studies (MAS) in Sustainable Finance and Development prepares you to address urgent sustainability challenges by providing expertise and vision.

Led by esteemed faculty and supported by a strong community, our program offers a rigorous curriculum that explores the intersection of finance, sustainability, and development. We equip students with analytical tools, critical thinking skills, and practical hands-on experiences to drive meaningful change. As you explore this program, you'll find a range of opportunities, from immersive field trips to a capstone project focused on addressing pressing sustainability issues.

Throughout your journey, you'll receive support from a community of scholars, practitioners, and fellow learners who share your commitment to making a positive impact.

- Tailor your studies according to your particular interests with interdisciplinary electives in sociology, political science, international law and history
- Build your professional network
- Benefit from an exceptional student-faculty ratio
- Learn French
- Join the Geneva Graduate Institute's network of 22'000 alumni, and be part of a diverse community of 110 nationalities from all 5 continents

Field Trip

The 2024 Field Trip of the MAS in SUstainable Finance and Development took place in Tbilisi, Georgia, at the crossroads between Europe and Asia.

Students had the privilege to visit the BlueOrchard Finance Ltd office, which currently oversees all the company's investments in the Middle East, Eastern Europe, the Caucasus, and Central Asia.

It was a remarkable experience to visit the International Finance Corporation (IFC) Tbilisi office and learn more about Georgia's development.

Students had the opportunity to visit the European Bank for Reconstruction and Development (EBRD) and learn about their goal to make Georgia's investments more competitive, green, and inclusive.

Capstone Project

The capstone project is the culmination of academic learning and practical application. It involves solving real-world problems in the Sustainable Finance field, conducting research, collaborating with different organisations and providing innovative solutions. Through this project, students demonstrate their mastery of Sustainable Finance and Development, critical thinking skills, and readiness for future career opportunities.

The 2023-2024 capstone project focused on developing Georgia's financial market by issuing green bonds in local currency.

Based on insights from the field trip to Tbilisi, Georgia, the assignment tasked students with analyzing JSC Georgia Capital's sustainability-linked bond issuance and proposing an alternative financing strategy. The key objectives included analyzing the bond's structure and terms, proposing a financing model incorporating blended finance and local currency issuance, researching other sustainability-linked bonds in emerging markets, conducting a risk assessment, and recommending a reporting framework for sustainability outcomes.

Through this assignment, students gained a comprehensive understanding of sustainability-linked bonds' role in promoting sustainable finance. Students also developed practical skills in designing a bond issuance that aligns with global standards and meets the interests of both issuers and investors focused on environmental and social governance (ESG) criteria.
